Full Environmental Assessment Form Part 1 - Project and Setting

Instructions for Completing Part 1

Part 1 is to be completed by the applicant or project sponsor. Responses become part of the application for approval or funding, are subject to public review, and may be subject to further verification.

Complete Part 1 based on information currently available. If additional research or investigation would be needed to fully respond to any item, please answer as thoroughly as possible based on current information; indicate whether missing information does not exist, or is not reasonably available to the sponsor; and, when possible, generally describe work or studies which would be necessary to update or fully develop that information.

Applicants/sponsors must complete all items in Sections A & B. In Sections C, D & E, most items contain an initial question that must be answered either "Yes" or "No". If the answer to the initial question is "Yes", complete the sub-questions that follow. If the answer to the initial question is "No", proceed to the next question. Section F allows the project sponsor to identify and attach any additional information. Section G requires the name and signature of the project sponsor to verify that the information contained in Part 1 is accurate and complete.

A. Project and Sponsor Information.

Name of Action or Project:				
CenterState NY Inland Port				
Project Location (describe, and attach a general location map):				
Towns of Dewitt and Onondaga, Onondaga County, New York. See Site Location map (Attac	chment A).			
Brief Description of Proposed Action (include purpose or need):				
The Port of Oswego Authority ("the Applicant") is proposing to construct an intermodal terminal facility, CenterState NY Inland Port ("the Project"), along the north side of Interstate 481 in the Towns of Dewitt and Onondaga, Onondaga County, New York. The Inland Port will handle, warehouse, and ship containerized and bulk cargo between CenterState NY region and the Port of NY/NJ. The Inland Port will provide a centralized location in New York State for freight transportation capabilities and value-added logistics capabilities, with the capacity to enhance manufacturers' storage and inventory management. The Project will reduce costs for regional manufacturers, allowing for the provision of long-term jobs and career building, company and industry growth, and increases in exports in accordance with regional and national export initiatives.				
Refer to Attachment B Project Description for additional information.				
Name of Applicant/Sponsor:	Telephone: 315.343.4503			
ort of Oswego Authority E-Mail: zkirincich@portoswego.com				
Address: 1 East 2nd Street

	tland or waterbody	which would be	affected (by name	water index number, wetland map numb	per or geographic
	•		, ·	corner of Project site. The pond was altered	
enl	larged to serve as a	wash/tailings pond fo	r quarry operations.		

ii. Describe how the proposed action would affect that waterbody or wetland, e.g. excavation, fill, placement of alteration of channels, banks and shorelines. Indicate extent of activities, alterations and additions in square for Portions of the previously altered pond will be filled and the remaining wetland pond complex will be similar in size/	feet or acres:
era pond, prior to its expansion for quarry operations.	
iii. Will proposed action cause or result in disturbance to bottom sediments? If Yes, describe: Bottom sediments will be buried.	✓ Yes No
iv. Will proposed action cause or result in the destruction or removal of aquatic vegetation? If Yes:	✓ Yes No
acres of aquatic vegetation proposed to be removed: +/- 6 acres	
 expected acreage of aquatic vegetation remaining after project completion: +/- 2 acres 	
 purpose of proposed removal (e.g. beach clearing, invasive species control, boat access): N/A	
proposed method of plant removal: N/A	
if chemical/herbicide treatment will be used, specify product(s): N/A	
v. Describe any proposed reclamation/mitigation following disturbance:	
The Project Sponsor will coordinate with the Central New York Regional Planning and Development Board regarding off-site	
c. Will the proposed action use, or create a new demand for water?	✓ Yes □No
If Yes: i. Total anticipated water usage/demand per day: 6,000 gallons/day	
ii. Will the proposed action obtain water from an existing public water supply?	Z Yes □No
If Yes:	<u>. 1 40</u>
Name of district or service area: Southwood-Jamesville WD (Town of Dewitt) and Onondaga County WD (Town	of Onondaga)
Does the existing public water supply have capacity to serve the proposal?	✓ Yes No
Is the project site in the existing district?	✓ Yes No
Is expansion of the district needed?	☐ Yes ✓ No
• Do existing lines serve the project site?	☐ Yes ✓ No
iii. Will line extension within an existing district be necessary to supply the project? If Yes:	✓ Yes □No
Describe extensions or capacity expansions proposed to serve this project:	
Extension of service lines onto property.	
Source(s) of supply for the district: Town of Dewitt water sources are Lake Ontario and Otisco Lake.	
<i>iv.</i> Is a new water supply district or service area proposed to be formed to serve the project site? If, Yes:	☐ Yes Z No
 Applicant/sponsor for new district: 	
Date application submitted or anticipated:	
Proposed source(s) of supply for new district:	
v. If a public water supply will not be used, describe plans to provide water supply for the project:	
vi. If water supply will be from wells (public or private), maximum pumping capacity: gallons/minute.	
d. Will the proposed action generate liquid wastes?	✓ Yes □No
If Yes:	
i. Total anticipated liquid waste generation per day:4,800 gallons/day	
ii. Nature of liquid wastes to be generated (e.g., sanitary wastewater, industrial; if combination, describe all comapproximate volumes or proportions of each):	
Sanitary wastewater	
ountary wastewater	
iii. Will the proposed action use any existing public wastewater treatment facilities? If Yes:	✓ Yes □No
Name of wastewater treatment plant to be used: Meadowbrook-Limestone Wastewater Treatment Plant	
Name of district: Onondaga County Water Environment Protection - Meadowbrook Limestone Service Area	
 Does the existing wastewater treatment plant have capacity to serve the project? 	∠ Yes □No
• Is the project site in the existing district?	✓ Yes □No
• Is expansion of the district needed?	☐Yes Z No

Do existing sewer lines serve the project site? Will line actuaries within an activity of district he access to a serve the accident.	☐Yes ☑No
 Will line extension within an existing district be necessary to serve the project? If Yes: 	Z Yes □No
Describe extensions or capacity expansions proposed to serve this project:	
Extension of existing service lines onto property.	
iv. Will a new wastewater (sewage) treatment district be formed to serve the project site?	☐Yes Z No
If Yes:	I es MINO
Applicant/sponsor for new district:	
 Applicant/sponsor for new district: Date application submitted or anticipated: 	
• What is the receiving water for the wastewater discharge? v. If public facilities will not be used, describe plans to provide wastewater treatment for the project, including specific plans to provide wastewater treatment for the project, including specific plans to provide wastewater treatment for the project, including specific plans to provide wastewater treatment for the project, including specific plans to provide wastewater treatment for the project, including specific plans to provide wastewater treatment for the project, including specific plans to provide wastewater treatment for the project, including specific plans to provide wastewater treatment for the project, including specific plans to provide wastewater treatment for the project, including specific plans to provide wastewater treatment for the project, including specific plans to provide wastewater treatment for the project, including specific plans to provide wastewater treatment for the project plans to provide wastewater plans to	
receiving water (name and classification if surface discharge, or describe subsurface disposal plans):	Jilying proposed
.: Describe and allower to continue mentals and an investor	
vi. Describe any plans or designs to capture, recycle or reuse liquid waste:	
e. Will the proposed action disturb more than one acre and create stormwater runoff, either from new point	Z Yes □No
sources (i.e. ditches, pipes, swales, curbs, gutters or other concentrated flows of stormwater) or non-point	2 2 6 5 1 1 0
source (i.e. sheet flow) during construction or post construction?	
If Yes:	
i. How much impervious surface will the project create in relation to total size of project parcel? Square feet or+/-4.6 acres (impervious surface)	
Square feet or 290 acres (parcel size)	
ii. Describe types of new point sources. The majority of the existing site is exposed bedrock (impervious). However, developm	ent of new access
roads and pad for containers will result in a net increase of impervious surfaces on-sit	
<i>iii.</i> Where will the stormwater runoff be directed (i.e. on-site stormwater management facility/structures, adjacent particularly groundwater, on-site surface water or off-site surface waters)?	properties,
On-site stormwater management facility will be directed to Rams Gulch.	
On the definitional management reasons with the directed to realist Section.	
If to surface waters, identify receiving water bodies or wetlands:	
Rams Gulch, to Butternut Creek.	
Will stormwater runoff flow to adjacent properties?	☐ Yes ✓ No
<i>iv.</i> Does proposed plan minimize impervious surfaces, use pervious materials or collect and re-use stormwater?	∠ Yes N o
f. Does the proposed action include, or will it use on-site, one or more sources of air emissions, including fuel	Z Yes □ No
combustion, waste incineration, or other processes or operations?	
If Yes, identify: i. Mobile sources during project operations (e.g., heavy equipment, fleet or delivery vehicles)	
Tractor trailers, trains, travel crane, and stackers.	
ii. Stationary sources during construction (e.g., power generation, structural heating, batch plant, crushers)	
Small generators and compressors. iii. Stationary sources during operations (e.g., process emissions, large boilers, electric generation)	
Small emergency(s) generator and small natural gas unit heaters.	
g. Will any air emission sources named in D.2.f (above), require a NY State Air Registration, Air Facility Permit,	☐Yes Z No
or Federal Clean Air Act Title IV or Title V Permit?	
If Yes:	
i. Is the project site located in an Air quality non-attainment area? (Area routinely or periodically fails to meet	□Yes□No
ambient air quality standards for all or some parts of the year) ii. In addition to emissions as calculated in the application, the project will generate:	
• Tons/year (short tons) of Carbon Dioxide (CO ₂)	
• Tons/year (short tons) of Nitrous Oxide (N ₂ O)	
Tons/year (short tons) of Perfluorocarbons (PFCs)	
•Tons/year (short tons) of Sulfur Hexafluoride (SF ₆)	
•Tons/year (short tons) of Carbon Dioxide equivalent of Hydroflourocarbons (HFCs)	
• Tons/year (short tons) of Hazardous Air Pollutants (HAPs)	

h. Will the proposed action generate or emit methane (included landfills, composting facilities)? If Yes: i. Estimate methane generation in tons/year (metric): ii. Describe any methane capture, control or elimination methane.		•	□Yes ✓ No

Nours of operation. Answer all items which apply. i. During Construction: Monday - Friday:	 ii. During Operations: Monday - Friday: Saturday: Sunday: Holidays: 	24 hours per day 24 hours per day	

m.	Will the proposed action produce noise that will exceed existing ambient noise levels during construction,	☐ Yes Z No
If,	operation, or both? yes:	
	Provide details including sources, time of day and duration:	
	The area is adjacent to an existing highway and railroad.	
ii.	Will proposed action remove existing natural barriers that could act as a noise barrier or screen?	Z Yes □No
	Describe: Majority of barriers (e.g., landform, trees) to remain, minor scrub-shrub removal along south side of site.	
	Will the proposed action have outdoor lighting?	∠ Yes □ No
	yes:	
l.	Describe source(s), location(s), height of fixture(s), direction/aim, and proximity to nearest occupied structures:	
	Lighting will have variable levels to minimize emissions and will maintain 0.0 foot candles at the property lines.	
ii.	Will proposed action remove existing natural barriers that could act as a light barrier or screen?	Z Yes □ No
	Describe: Majority of barriers (e.g., landform, trees) to remain, minor scrub-shrub removal along south side of site.	
	Does the proposed action have the potential to produce odors for more than one hour per day?	☐ Yes Z No
0.	If Yes, describe possible sources, potential frequency and duration of odor emissions, and proximity to nearest	I res Mino
	occupied structures:	
	W'll d	
	Will the proposed action include any bulk storage of petroleum (combined capacity of over 1,100 gallons) or chemical products 185 gallons in above ground storage or any amount in underground storage?	∠ Yes □ No
	Yes:	
	Product(s) to be stored Diesel Fuel	
ii.	Volume(s) 5000 per unit time Month (e.g., month, year)	
iii.	Generally describe proposed storage facilities:	
	Double lined above ground storage tanks	
	Will the proposed action (commercial, industrial and recreational projects only) use pesticides (i.e., herbicides,	☐ Yes ☑ No
	insecticides) during construction or operation?	
	Yes:	
	i. Describe proposed treatment(s):	
i	i. Will the proposed action use Integrated Pest Management Practices?	☐ Yes ☐No
	Will the proposed action (commercial or industrial projects only) involve or require the management or disposal	✓ Yes ☐ No
	of solid waste (excluding hazardous materials)?	
	Yes:	
1.	Describe any solid waste(s) to be generated during construction or operation of the facility:	
	 Construction: 3 tons per month (unit of time) Operation: 60 tons per month (unit of time) 	
ii	Describe any proposals for on-site minimization, recycling or reuse of materials to avoid disposal as solid waste	
ıı	 Construction: Quarry spoils and stone dust to be used as fill and surfacing materials. Use of OCCRA compost for lands 	
	construction address of the state of the sta	- Capilly
	Operation: Best management practices for solid waste generation including recycling of cardboard and paper production.	ts and use of recycled
	materials	
iii.	Proposed disposal methods/facilities for solid waste generated on-site:	
	Construction: Onondaga County Resource Recovery Agency (OCCRA)	
	Operation: OCCRA	

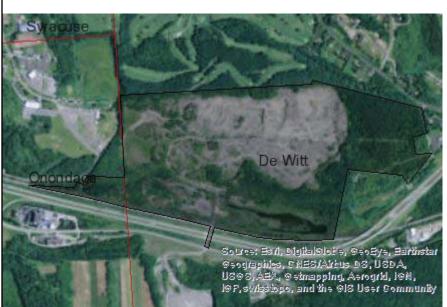

Does the proposed action include construction or modification of a solid waste management facility?					
If Yes: i Type of management or handling of waste proposed.	<i>i</i> . Type of management or handling of waste proposed for the site (e.g., recycling or transfer station, composting, landfill, or				
other disposal activities):					
ii. Anticipated rate of disposal/processing:					
 Tons/month, if transfer or other non-combustion/thermal treatment, or Tons/hour, if combustion or thermal treatment 					
iii. If landfill, anticipated site life:	years				
t. Will proposed action at the site involve the commercial	generation, treatment, storage	e. or disposal of hazardous	☐Yes Z No

Signature Title Executive Director, Port of Oswego	

Disclaimer: The EAF Mapper is a screening tool intended to assist project sponsors and reviewing agencies in preparing an environmental assessment form (EAF). Not all questions asked in the EAF are answered by the EAF Mapper. Additional information on any EAF question can be obtained by consulting the EAF Workbooks. Although the EAF Mapper provides the most up-to-date digital data available to DEC, you may also need to contact local or other data sources in order to obtain data not provided by the Mapper. Digital data is not a substitute for agency determinations.

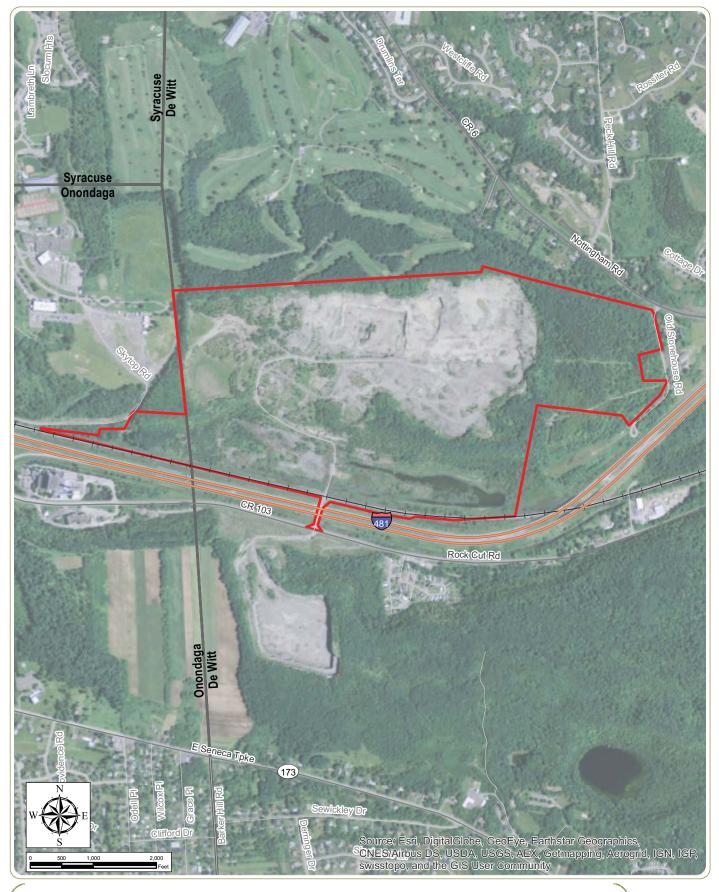

B.i.i [Coastal or Waterfront Area]	No
B.i.ii [Local Waterfront Revitalization Area]	No

Project Description

Attachment B: Project Description

Project Description

The Port of Oswego Authority (hereafter, "the Applicant") is proposing to construct an intermodal terminal facility, the CenterState NY Inland Port (hereafter, "the Inland Port" or "the Project"), along the north side of Interstate 481 in the Towns of Dewitt and Onondaga, Onondaga County, New York. The Inland Port will handle, warehouse, and ship freight between the Center State NY region and the Port of NY/NJ, as well as the Port of Oswego providing a centralized location in New York State for freight transportation capabilities and value-added logistics capabilities. The Inland Port will also serve as High-Tech transportation-related research center.

The Project will provide regional manufacturers and businesses with a much needed, centrally located, inland container, bulk cargo, warehousing, and shipping facility which will reduce costs for regional manufacturers, allowing for the provision of long-term jobs and career building, company and industry growth, and increases in exports in accordance with regional and national export initiatives.

The Inland Port facility will consist of four major components including 1) approximately 11,000 feet of new rail siding and 9,000 feet of loading/offloading track, 2) a container and stacking area where intermodal shipping containers are aggregated prior to dispatch to port, incoming containers are stored for clearance and where empty containers await onward movement, 3) warehousing facilities where cargo is received, stored and/or delivered and containers are filled, emptied and/or consolidated and 4) a Gate Complex and Administrative Center which regulates the entry and exit of road vehicles carrying cargo and containers through the terminal and where documentation, security and container inspection procedures are undertaken. The Inland Port will be subject to federal security regulations and will employ state-of-the-art shipment tracking, warehouse inventory, and other logistical management software to ensure that manufacturers have real-time data to inform their production and shipping schedules. In addition, the Inland Port will provide on-site space for companies looking for manufacturing space, targeting small and emerging regional manufacturers.

The Inland Port will create substantial job growth for the region and will incorporate an extension learning center offering internships to area college students specializing in transportation, distribution and logistics.

The Inland Port will occupy a 290 plus-acre site, part of the Jamesville Quarry, owned by Hanson Aggregates North America (Hanson). Due to underutilization, Hanson is relinquishing mining rights to the Project site, returning the property to a commercial and revenue producing state. The New York State Department of Environmental Conservation (NYSDEC) has already requested that Hanson perform site reclamation at this underutilized portion of the quarry.

Work to develop the site as an Inland Port will occur upon completion of mining site reclamation by Hanson. In general, construction of the Inland Port will include site grading, site drainage, wetland mitigation, installation of utilities (electric, sewer, water, gas, etc.), as well as development of infrastructure, such as access roads, truck processing facilities, maintenance and office buildings, improvements to approximately 12,000 feet of existing adjacent railroad tracks and the development of an 11,000 foot siding and three 3,000 foot long loading/unloading tracks within the facility.

Full Environmental Assessment Form Part 2 - Identification of Potential Project Impacts

	Agency Use Only [If applicable]
Project:	
Date:	

Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency and the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

Tips for completing Part 2:

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer "Yes" to a numbered question, please complete all the questions that follow in that section.
- If you answer "No" to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box "Moderate to large impact may occur."
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the "whole action".
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.

 Answer the question in a reasonable manner considering the scale and context of the project. 			
1. Impact on Land Proposed action may involve construction on, or physical alteration of, the land surface of the proposed site. (See Part 1. D.1) If "Yes", answer questions a - j. If "No", move on to Section 2.	□NO ✓ YES		YES
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action may involve construction on land where depth to water table is less than 3 feet.	E2d		Ø
b. The proposed action may involve construction on slopes of 15% or greater.	E2f		
c. The proposed action may involve construction on land where bedrock is exposed, or generally within 5 feet of existing ground surface.	E2a		
d. The proposed action may involve the excavation and removal of more than 1,000 tons of natural material.	D2a		
e. The proposed action may involve construction that continues for more than one year or in multiple phases.	Dle		
f. The proposed action may result in increased erosion, whether from physical disturbance or vegetation removal (including from treatment by herbicides).	D2e, D2q		
g. The proposed action is, or may be, located within a Coastal Erosion hazard area.	Bli		
h. Other impacts:			

2. Impact on Geological Features The proposed action may result in the modification or destruction of, or inhib			
access to, any unique or unusual land forms on the site (e.g., cliffs, dunes, minerals, fossils, caves). (See Part 1. E.2.g)	∠ NO) [YES
If "Yes", answer questions a - c. If "No", move on to Section 3.	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. Identify the specific land form(s) attached:	E2g		
b. The proposed action may affect or is adjacent to a geological feature listed as a registered National Natural Landmark. Specific feature:	E3c		
c. Other impacts:			
3. Impacts on Surface Water The proposed action may affect one or more wetlands or other surface water bodies (e.g., streams, rivers, ponds or lakes). (See Part 1. D.2, E.2.h) If "Yes", answer questions a - 1. If "No", move on to Section 4.	□NC		YES
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action may create a new water body.	D2b, D1h		
b. The proposed action may result in an increase or decrease of over 10% or more than a 10 acre increase or decrease in the surface area of any body of water.	D2b		Ø
c. The proposed action may involve dredging more than 100 cubic yards of material from a wetland or water body.	D2a	Ø	
d. The proposed action may involve construction within or adjoining a freshwater or tidal wetland, or in the bed or banks of any other water body.	E2h		Ø
e. The proposed action may create turbidity in a waterbody, either from upland erosion, runoff or by disturbing bottom sediments.	D2a, D2h	Ø	
f. The proposed action may include construction of one or more intake(s) for withdrawal of water from surface water.	D2c	Ø	
g. The proposed action may include construction of one or more outfall(s) for discharge of wastewater to surface water(s).	D2d	Ø	
h. The proposed action may cause soil erosion, or otherwise create a source of stormwater discharge that may lead to siltation or other degradation of receiving water bodies.	D2e	Ø	
i. The proposed action may affect the water quality of any water bodies within or downstream of the site of the proposed action.	E2h	Ø	
j. The proposed action may involve the application of pesticides or herbicides in or around any water body.	D2q, E2h	Ø	
k. The proposed action may require the construction of new, or expansion of existing, wastewater treatment facilities.	D1a, D2d	Ø	

Other impacts: The proposed action may significantly reduce a seed source for Phragmites australis downstream of the proposed action.			Ø
4. Impact on groundwater The proposed action may result in new or additional use of ground water, or may have the potential to introduce contaminants to ground water or an aquifer. (See Part 1. D.2.a, D.2.c, D.2.d, D.2.p, D.2.q, D.2.t) If "Yes", answer questions a - h. If "No", move on to Section 5.			
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action may require new water supply wells, or create additional demand on supplies from existing water supply wells.	D2c		
b. Water supply demand from the proposed action may exceed safe and sustainable withdrawal capacity rate of the local supply or aquifer. Cite Source:	D2c		
c. The proposed action may allow or result in residential uses in areas without water and sewer services.	D1a, D2c		
d. The proposed action may include or require wastewater discharged to groundwater.	D2d, E2l		
e. The proposed action may result in the construction of water supply wells in locations where groundwater is, or is suspected to be, contaminated.	D2c, E1f, E1g, E1h		
f. The proposed action may require the bulk storage of petroleum or chemical products over ground water or an aquifer.	D2p, E2l		
g. The proposed action may involve the commercial application of pesticides within 100 feet of potable drinking water or irrigation sources.	E2h, D2q, E2l, D2c		
h. Other impacts:			
5. Impact on Flooding The proposed action may result in development on lands subject to flooding. (See Part 1. E.2) If "Yes", answer questions a - g. If "No", move on to Section 6.	□NO		YES
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action may result in development in a designated floodway.	E2i	Ø	
b. The proposed action may result in development within a 100 year floodplain.	E2j	Ø	
c. The proposed action may result in development within a 500 year floodplain.	E2k	Ø	
d. The proposed action may result in, or require, modification of existing drainage patterns.	D2b, D2e		Ø
e. The proposed action may change flood water flows that contribute to flooding.	D2b, E2i, E2j, E2k		
f. If there is a dam located on the site of the proposed action, is the dam in need of repair, or upgrade?	E1e	Ø	

g. Other impacts:			
	•		
6. Impacts on Air The proposed action may include a state regulated air emission source. (See Part 1. D.2.f., D,2,h, D.2.g) If "Yes", answer questions a - f. If "No", move on to Section 7.	✓NO		YES
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
 a. If the proposed action requires federal or state air emission permits, the action may also emit one or more greenhouse gases at or above the following levels: i. More than 1000 tons/year of carbon dioxide (CO₂) ii. More than 3.5 tons/year of nitrous oxide (N₂O) iii. More than 1000 tons/year of carbon equivalent of perfluorocarbons (PFCs) iv. More than .045 tons/year of sulfur hexafluoride (SF₆) v. More than 1000 tons/year of carbon dioxide equivalent of hydrochloroflourocarbons (HFCs) emissions vi. 43 tons/year or more of methane 	D2g D2g D2g D2g D2g D2g		
b. The proposed action may generate 10 tons/year or more of any one designated hazardous air pollutant, or 25 tons/year or more of any combination of such hazardous air pollutants.	D2g		
c. The proposed action may require a state air registration, or may produce an emissions rate of total contaminants that may exceed 5 lbs. per hour, or may include a heat source capable of producing more than 10 million BTU's per hour.	D2f, D2g		
d. The proposed action may reach 50% of any of the thresholds in "a" through "c", above.	D2g		
e. The proposed action may result in the combustion or thermal treatment of more than 1 ton of refuse per hour.	D2s		
f. Other impacts:			
7. Impact on Plants and Animals The proposed action may result in a loss of flora or fauna. (See Part 1. E.2. 1 If "Yes", answer questions a - j. If "No", move on to Section 8.	nq.)	□NO	✓ YES
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action may cause reduction in population or loss of individuals of any threatened or endangered species, as listed by New York State or the Federal government, that use the site, or are found on, over, or near the site.	E20	Ø	
b. The proposed action may result in a reduction or degradation of any habitat used by any rare, threatened or endangered species, as listed by New York State or the federal government.	E2o		Ø
c. The proposed action may cause reduction in population, or loss of individuals, of any species of special concern or conservation need, as listed by New York State or the Federal government, that use the site, or are found on, over, or near the site.	E2p	Ø	
d. The proposed action may result in a reduction or degradation of any habitat used by any species of special concern and conservation need, as listed by New York State or the Federal government.	E2p	Ø	

e. The proposed action may diminish the capacity of a registered National Natural Landmark to support the biological community it was established to protect.	E3c	Ø	
f. The proposed action may result in the removal of, or ground disturbance in, any portion of a designated significant natural community. Source:	E2n	Ø	
g. The proposed action may substantially interfere with nesting/breeding, foraging, or over-wintering habitat for the predominant species that occupy or use the project site.	E2m	Ø	
h. The proposed action requires the conversion of more than 10 acres of forest, grassland or any other regionally or locally important habitat. Habitat type & information source: Estimated per aerial photo interpretation	E1b		Ø
i. Proposed action (commercial, industrial or recreational projects, only) involves use of herbicides or pesticides.	D2q	Ø	
j. Other impacts:			
8. Impact on Agricultural Resources The proposed action may impact agricultural resources. (See Part 1. E.3.a. and b.) If "Yes", answer questions a - h. If "No", move on to Section 9. YES

b. The proposed action may result in the obstruction, elimination or significant screening of one or more officially designated scenic views.	E3h, C2b	Ø	
c. The proposed action may be visible from publicly accessible vantage points: i. Seasonally (e.g., screened by summer foliage, but visible during other seasons) ii. Year round	E3h	Z I	
d. The situation or activity in which viewers are engaged while viewing the proposed action is:i. Routine travel by residents, including travel to and from workii. Recreational or tourism based activities	E3h E2q, E1c	Z Z	
e. The proposed action may cause a diminishment of the public enjoyment and appreciation of the designated aesthetic resource.	E3h	Ø	
f. There are similar projects visible within the following distance of the proposed project: 0-1/2 mile ½-3 mile 3-5 mile 5+ mile	D1a, E1a, D1f, D1g	Ø	
g. Other impacts:			
10. Impact on Historic and Archeological Resources The proposed action may occur in or adjacent to a historic or archaeological resource. (Part 1. E.3.e, f. and g.) If "Yes", answer questions a - e. If "No", go to Section 11.	□N0) [YES
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action may occur wholly or partially within, or substantially contiguous to, any buildings, archaeological site or district which is listed on or has been nominated by the NYS Board of Historic Preservation for inclusion on the State or National Register of Historic Places.	E3e	Ø	
b. The proposed action may occur wholly or partially within, or substantially contiguous to, an area designated as sensitive for archaeological sites on the NY State Historic Preservation Office (SHPO) archaeological site inventory.	E3f	Ø	
c. The proposed action may occur wholly or partially within, or substantially contiguous to, an archaeological site not included on the NY SHPO inventory.	E3g	Ø	

d. Other impacts:			
e. If any of the above (a-d) are answered "Yes", continue with the following questions to help support conclusions in Part 3:			
 The proposed action may result in the destruction or alteration of all or part of the site or property. 	E3e, E3g, E3f	Ø	
The proposed action may result in the alteration of the property's setting or integrity.	E3e, E3f, E3g, E1a, E1b	Ø	
iii. The proposed action may result in the introduction of visual elements which are out of character with the site or property, or may alter its setting.	E3e, E3f, E3g, E3h, C2, C3	Ø	
11. Impact on Open Space and Recreation The proposed action may result in a loss of recreational opportunities or a reduction of an open space resource as designated in any adopted municipal open space plan. (See Part 1. C.2.c, E.1.c., E.2.q.) If "Yes", answer questions a - e. If "No", go to Section 12.	No	o 🗸	YES
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action may result in an impairment of natural functions, or "ecosystem services", provided by an undeveloped area, including but not limited to stormwater storage, nutrient cycling, wildlife habitat.	D2e, E1b E2h, E2m, E2o, E2n, E2p		Ø
b. The proposed action may result in the loss of a current or future recreational resource.	C2a, E1c, C2c, E2q	Ø	
c. The proposed action may eliminate open space or recreational resource in an area with few such resources.	C2a, C2c E1c, E2q	\square	
d. The proposed action may result in loss of an area now used informally by the community as an open space resource.	C2c, E1c	\square	
e. Other impacts:			
		•	•
12. Impact on Critical Environmental Areas The proposed action may be located within or adjacent to a critical environmental area (CEA). (See Part 1. E.3.d) If "Yes", answer questions a - c. If "No", go to Section 13.	✓ No	o 🗌	YES
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action may result in a reduction in the quantity of the resource or characteristic which was the basis for designation of the CEA.	E3d		
b. The proposed action may result in a reduction in the quality of the resource or characteristic which was the basis for designation of the CEA.	E3d		
c. Other impacts:			
	1	1	I

13. Impact on Transportation The proposed action may result in a change to existing transportation systems (See Part 1. D.2.j)	s. No	O 🗸	YES
If "Yes", answer questions a - g. If "No", go to Section 14.	D	3 .7	36.3
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. Projected traffic increase may exceed capacity of existing road network.	D2j		
b. The proposed action may result in the construction of paved parking area for 500 or more vehicles.	D2j		
c. The proposed action will degrade existing transit access.	D2j	Ø	
d. The proposed action will degrade existing pedestrian or bicycle accommodations.	D2j	Ø	
e. The proposed action may alter the present pattern of movement of people or goods.	D2j		Ø
f. Other impacts:			
14. Impact on Energy The proposed action may cause an increase in the use of any form of energy. (See Part 1. D.2.k) If "Yes", answer questions a - e. If "No", go to Section 15.	□N) \[YES
If Tes , unswer questions a c. If No , go to section 15.	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action will require a new, or an upgrade to an existing, substation.	D2k	V	
b. The proposed action will require the creation or extension of an energy transmission or supply system to serve more than 50 single or two-family residences or to serve a commercial or industrial use.	D1f, D1q, D2k		Ø
c. The proposed action may utilize more than 2,500 MWhrs per year of electricity.	D2k	Ø	
d. The proposed action may involve heating and/or cooling of more than 100,000 square feet of building area when completed.	Dlg		
e. Other Impacts:			
15. Impact on Noise, Odor, and Light The proposed action may result in an increase in noise, odors, or outdoor light (See Part 1. D.2.m., n., and o.) If "Yes", answer questions a - f. If "No", go to Section 16.	ting. NC) /	YES
	Relevant Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action may produce sound above noise levels established by local regulation.	D2m	☑	
b. The proposed action may result in blasting within 1,500 feet of any residence, hospital, school, licensed day care center, or nursing home.	D2m, E1d	Ø	
c. The proposed action may result in routine odors for more than one hour per day.	D2o	\square	

d. The proposed action may result in light shining onto adjoining properties.	D2n	V			
e. The proposed action may result in lighting creating sky-glow brighter than existing area conditions.	D2n, E1a		\square		
f. Other impacts:		Ø			
	I				
16. Impact on Human Health The proposed action may have an impact on human health from exposure to new or existing sources of contaminants. (See Part 1.D.2.q., E.1. d. f. g. and h.) If "Yes", answer questions a - m. If "No", go to Section 17.					
	Relevant Part I Question(s)	No,or small impact may cccur	Moderate to large impact may occur		
a. The proposed action is located within 1500 feet of a school, hospital, licensed day care center, group home, nursing home or retirement community.	E1d		Ø		
b. The site of the proposed action is currently undergoing remediation.	E1g, E1h	Ø			
c. There is a completed emergency spill remediation, or a completed environmental site remediation on, or adjacent to, the site of the proposed action.	E1g, E1h	Ø			
d. The site of the action is subject to an institutional control limiting the use of the property (e.g., easement or deed restriction).	E1g, E1h				
e. The proposed action may affect institutional control measures that were put in place to ensure that the site remains protective of the environment and human health.	E1g, E1h	\square			
f. The proposed action has adequate control measures in place to ensure that future generation, treatment and/or disposal of hazardous wastes will be protective of the environment and human health.	D2t	Ø			
g. The proposed action involves construction or modification of a solid waste management facility.	D2q, E1f	Ø			
h. The proposed action may result in the unearthing of solid or hazardous waste.	D2q, E1f	☑			
i. The proposed action may result in an increase in the rate of disposal, or processing, of solid waste.	D2r, D2s				
j. The proposed action may result in excavation or other disturbance within 2000 feet of a site used for the disposal of solid or hazardous waste.	E1f, E1g E1h		Ø		
k. The proposed action may result in the migration of explosive gases from a landfill site to adjacent off site structures.	E1f, E1g	Ø			
1. The proposed action may result in the release of contaminated leachate from the project site.	D2s, E1f, D2r	Ø			
m. Other impacts:					

17. Consistency with Community Plans			
The proposed action is not consistent with adopted land use plans.	NO	√ /	YES
(See Part 1. C.1, C.2. and C.3.)			
If "Yes", answer questions a - h. If "No", go to Section 18.		NT.	34.1
	Relevant Part I	No, or small	Moderate to large
	Question(s)	impact	impact may
		may occur	occur
a. The proposed action's land use components may be different from, or in sharp contrast to, current surrounding land use pattern(s).	C2, C3, D1a E1a, E1b	Ø	
b. The proposed action will cause the permanent population of the city, town or village in which the project is located to grow by more than 5%.	C2	V	
c. The proposed action is inconsistent with local land use plans or zoning regulations.	C2, C2, C3	\square	
d. The proposed action is inconsistent with any County plans, or other regional land use plans.	C2, C2	Ø	
e. The proposed action may cause a change in the density of development that is not supported by existing infrastructure or is distant from existing infrastructure.	C3, D1c, D1d, D1f, D1d, Elb	Ø	
f. The proposed action is located in an area characterized by low density development that will require new or expanded public infrastructure.	C4, D2c, D2d D2j		Ø
g. The proposed action may induce secondary development impacts (e.g., residential or commercial development not included in the proposed action)	C2a		Ø
h. Other:			
18. Consistency with Community Character			
The proposed project is inconsistent with the existing community character. (See Part 1. C.2, C.3, D.2, E.3)	NO	▼ 2	YES
If "Yes", answer questions a - g. If "No", proceed to Part 3.	Relevant	No. or	Madawata
	Part I Question(s)	No, or small impact may occur	Moderate to large impact may occur
a. The proposed action may replace or eliminate existing facilities, structures, or areas of historic importance to the community.	E3e, E3f, E3g	Z	
b. The proposed action may create a demand for additional community services (e.g. schools, police and fire)	C4		Z
c. The proposed action may displace affordable or low-income housing in an area where there is a shortage of such housing.	C2, C3, D1f D1g, E1a		
d. The proposed action may interfere with the use or enjoyment of officially recognized or designated public resources.	C2, E3	V	
e. The proposed action is inconsistent with the predominant architectural scale and character.	C2, C3	Ø	
f. Proposed action is inconsistent with the character of the existing natural landscape.	C2, C3 E1a, E1b E2g, E2h	Ø	
g. Other impacts:

Full Environmental Assessment Form Part 3 - Evaluation of the Magnitude and Importance of Project Impacts and Determination of Significance

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

Reasons Supporting This Determination:

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact
 occurring, number of people affected by the impact and any additional environmental consequences if the impact were to
 occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where
 there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse
 environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.
- The proposed action may involve construction on land where depth to water table is less than 3 feet.
- The proposed action may involve construction on land where bedrock is exposed, or generally within 5 feet of existing ground surface.
- The proposed action may involve the excavation and removal of more than 1,000 tons of natural material
- The proposed action may involve construction that continues for more than one year or in multiple phases.
- The proposed action may result in an increase or decrease of over 10% or more than a 10 acre increase or decrease in the surface area of any body of
 water.
- The proposed action may involve construction within or adjoining a freshwater or tidal wetland, or in the bed or banks of any other water body.
- The proposed action may significantly reduce a seed source for Phragmites australis downstream of the proposed action.
- The proposed action may result in, or require, modification of existing drainage patterns.
- The proposed action may result in a reduction or degradation of any habitat used by any rare, threatened or endangered species, as listed by New York State or the federal government.
- The proposed action requires the conversion of more than 10 acres of forest, grassland or any other regionally or locally important habitat.
- The proposed action may result in an impairment of natural functions, or "ecosystem services", provided by an undeveloped area, including but not limited to stormwater storage, nutrient cycling, wildlife habitat.
- The projected proposed project traffic increase may exceed capacity of existing road network.
- The proposed action may result in the construction of paved parking area for 500 or more vehicles.
- The proposed action may alter the present pattern of movement of people or goods.
- The proposed action will require the creation or extension of an energy transmission or supply system to serve a commercial or industrial use.
- The proposed action may involve heating and/or cooling of more than 100,000 square feet of building area when completed.
- The proposed action may result in lighting creating sky-glow brighter than existing area conditions.
- The proposed action is located within 1500 feet of a school, hospital, licensed day care center, group home, nursing home or retirement community.
- The proposed action may result in excavation or other disturbance within 2000 feet of a site used for the disposal of solid or hazardous waste.
- The proposed action is located in an area characterized by low density development that will require new or expanded public infrastructure.
- The proposed action may induce secondary development impacts (e.g., residential or commercial development not included in the proposed action)
- The proposed action may create a demand for additional community services (e.g. schools, police and fire).

	Determination of S	Significance - '	Type 1 and Un	listed Actions
SEQR Status:	✓ Type 1	Unlisted		
Identify portions of EAF	completed for this Project:	✓ Part 1	Part 2	Part 3

Upon review of the information recorded on this EAF, as noted, plus this additional support information No additional information
and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the Port of Oswego Authority as lead agency that:
A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.
B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:
There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.d). C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.
Name of Action: CenterState NY Inland Port
Name of Lead Agency: Port of Oswego Authority
Name of Responsible Officer in Lead Agency: Zelko Kirincich
Title of Responsible Officer: Executive Director & CEO
Signature of Responsible Officer in Lead Agency: Pell Date: 9/30/2015
Signature of Preparer (if different from Responsible Officer) 7 a Sewulo C\$ Date: 9/30/2015
For Further Information:
Contact Person: Zelko Kirincich
Address: 1 East 2nd Street, Oswego NY, 13126
Telephone Number: 315-343-4503
E-mail: zkirincich@portoswego.com
For Type 1 Actions and Conditioned Negative Declarations, a copy of this Notice is sent to:
Chief Executive Officer of the political subdivision in which the action will be principally located (e.g., Town / City / Village of) Other involved agencies (if any) Applicant (if any) Environmental Notice Bulletin: http://www.dec.ny.gov/enb/enb.html
